

JAVA WEB SERVICES INTEGRATION DEVELOPER

Position: Full-time

Reports To: VP, Professional Services

Location: GTA (minimal travel required)

Education: University degree/diploma in computers, engineering or a related discipline

Experience: 2 – 10+ years required

WE'RE AGILE SOFTWARE DEVELOPMENT EXPERTS

Our clients – ranging from small startups to non-profit organizations, to government agencies to mega brands – have sought our expertise to crystallize their business needs and to develop the right solution. Whether it's Agile software delivery of custom apps and integration, open source code, system optimization, off-the-shelf software, all of the above or none of the above, we listen to our clients and make their success our priority.

When it comes to user experience and user interface, we've got the smartest, most passionate, never-fail team around. Our clients must agree because they're looking for more of our time, which means we're looking for more outstanding people.

POSITION SUMMARY

As a member of our core Agile delivery team, you will help build innovative and inspiring solutions for a range of organizations including many of North America's top companies. Working with us as a Java Web Services Integration Developer means you'll:

- Demonstrate your experience with a broad range of web application development tools and techniques
- Employ your skills with building great user experiences and integrating web apps with back-end systems
- Build tailored solutions using cutting edge web development tools and technologies
- Learn and work with the latest development technologies such as Grails and Groovy
- Have access to tools and training that will help keep you current with the technologies and systems that are pertinent to your work
- Work alongside a team of collaborative software innovators
- Opportunities to grow your career into technical leadership roles

RESPONSIBILITIES

- Apply your broad-based development expertise to create practical, innovative solutions
- Efficiently implement clean, maintainable, and testable software
- Provide work effort estimates
- Interact directly with Architech Solutions' partners and clients
- Maintain clear communications with all stakeholders throughout project lifecycles
- Interact with Software Engineers/Developers to integrate with backend services and enterprise systems
- Apply excellent communications skills, creativity and practical knowledge to benefit our clients and to effectively represent Architech Solutions
- Participate in agile project execution

QUALIFICATIONS, SKILLS AND COMPETENCIES

- Post secondary education in computers, engineering or equivalent training/experience
- 2-10+ years designing/implementing interactive, data-intensive Internet applications
- Solid understanding of semantic layout techniques, JavaScript and JavaScript frameworks (jQuery, Prototype)
- In-depth knowledge of DOM, HTML, HTML5 and CSS
- Fluency in Adobe CS and related front-end development
- Experience with RIA technologies (AJAX, Flex, Flash, Google Web Toolkit GWT)
- Experience with modern browser support and accessibility
- Experience with Web Services (including SOAP, XML, XML Schema, JSON, open APIs and/or REST)
- Experience with Java and J2EE/Java EE (including servlets, JSP, JSF, JDBC)
- Experience with Groovy would be helpful
- Experience with one or more of the following RDBMS: Oracle 10g, MySQL 5.x, SQL Server 2005/2008 coupled with a solid understanding and experience with SQL
- Experience with Eclipse, SVN and QA tools
- Experience with deploying and training Java application servers (eg. JBoss, WebSphere, Web Logic) a plus
- Experience with other integration technologies (eg. messaging data integration) a plus
- Agile project experience a plus
- Strong analytical skills and the ability to meet tight deadlines is essential for a fast-paced environment
- Solid understanding of client deliverables and the ability to take responsibility for them
- Exceptional in both written and spoken English with excellent written and verbal communication skills
